

# Pendikan : On-Campus Tutoring System

**Group Members** : Rohan Menon, Ankit Tibadiya, Bingying Chen, Guoxiao Tao

**Description** : On-campus tutoring system for students to help fellow students. Students who received an A and above in a subject can help current students enrolled in that subject. The idea is to provide a platform between a student in need and a tutor. A student issues a "Request" which can be viewed by the tutors. Tutors willing to accept the request will respond with an "Accept".

## **Core Features:**

- Login / Signup page
- Main Page : If you're only a student it will show the name of the courses you are registered for. Clicking on the name of the courses will allow you to create a "Request" in that course. If you are also a tutor, it will show the name of the subject in which you are enrolled as a tutor. Clicking on the subject will open the active requests in that subject.
- Become a tutor : An option which lets a student become a tutor in a particular course.
- Post Request : A student can post a request on the main page which would be viewed by the tutors. A "Request" will consist a preferred date,time and location entered by the student.
- Accept Request : A tutor can check the open request and accept it.
- Edit Request : The student can remove the request if he feels that his doubts in the subject has been solved
- Meet : If more than one tutor accepts the request, the student gets to choose which tutor he wants to study with. After the student chooses, a common location on the campus along with a time would be sent to both.

## **Extra Features:**

- Reward System: Incorporating a reward system for the tutors for spending their precious time for helping someone.
- Reviews : A student can add a review for a tutor.
- Deferred Accept: A tutor can reply with an Deferred Accept in which the tutor can change the time,location or date of the request.
- Email Notification: Email notification of Accept Request to tutor and student.
