

# Project Pitch Presentation

**Group 12** 

## The Problem or Demand

# Thermal Energy

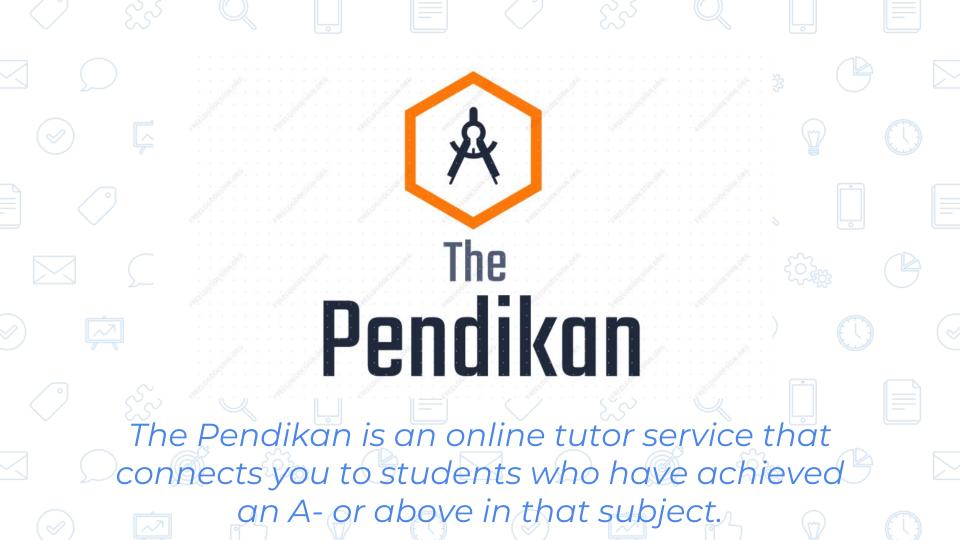

**Thermal energy** is a term that can refer to several different thermodynamic quantities, such as the internal energy of a system; heat or sensible heat, which are defined as types of transfer of energy (as is work); or for the characteristic energy of a degree of freedom in a thermal system kT, where T is temperature and k is the Boltzmann constant.

In thermodynamics, the **internal energy** of a system is the energy contained within the system, excluding the kinetic energy of motion of the system as a whole and the potential energy of the system as a whole due to external force fields. It keeps account of the gains and losses of energy of the system that are due to changes in its internal state.

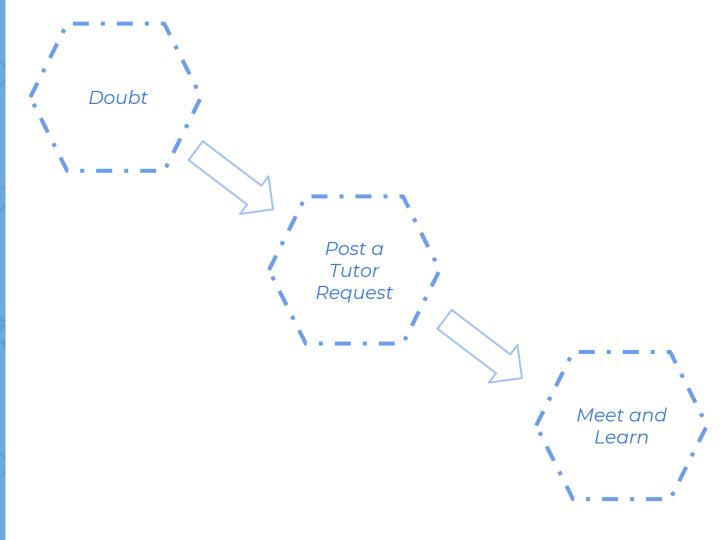

The **Boltzmann constant** ( $k_{\rm B}$  or k) is a physical constant relating the average kinetic energy of particles in a gas with the temperature of the gas<sup>[2]</sup> and occurs in Planck's law of black-body radiation and in Boltzmann's entropy formula.

**Planck's law** describes the spectral density of electromagnetic radiation emitted by a black body in thermal equilibrium at a given temperature *T*. The law is named after Max Planck, who proposed it in 1900. It is a pioneering result of modern physics and quantum theory.

## Solution: People who already know about Thermal Energy.

#### **Tutor Review**

This feature would allow users to give reviews to tutors they have studied with

#### **Reward System**

This feature would give rewards to the tutors who spend their precious time teaching others

#### **Social Media**

This feature would allow the users to integrate their social media accounts with Pendikan

#### **Request Search**

Search previous requests by searching the topic name or by ID

#### **Email Notification**

This feature would send email notifications to the students who have active requests when any tutor accepts their request

#### **Deferred Accept**

Tutor can accept the request but can change the time and location. This may or may not be accepted by the student.

Tutor: Marcella M.

Psychology and neuroscience, Cambridge University

Ashley Student from London

Very helpful with my coursework at university

★ ★ ★ ★ November 11 2018

Tutor: Alicia W.

BA Geography, Birmingham University

Nel Parent from Ilkley

Alicia's lessons are well structured and she clearly puts lots of effort into planning them. Lessons are tail suit my sons needs and as a result he is making much better progress in Geography. She is fab.

★ ★ ★ ★ ★ November 11 2018

Tutor: Lara M.

Chemistry, St Catherine's College, Oxford University

Emma Parent from Egham

Very helpful lesson, made me feel much better about the exam papers - thank you!
